

Work smarter, not harder

# Windows Small Business Server 2008

## SMALL BUSINESS SERVER

### Your Issue . .

- You're spending valuable time trying to find documents on numerous PCs and are often finding multiple versions in various locations.
- Your IT costs are sky-rocketing through the purchase of new printers, software and Internet accounts.
- You and your employees cannot access email on the move or work from home securely, but there is a requirement for this to happen.
- Important files are not organised and are scattered in obscure folders, so it's becoming harder to access them and more difficult to back-up.

### Key Benefits . .

#### Greater Protection of Data

Share Printers & Files

Reduce Security Risks

Access Emails Anywhere

Minimise Duplicated Documents

Internal Web Site

### The Solution . .

Microsoft Small Business Server 2008 (SBS) is server technology that provides a powerful advantage for your business by creating a more efficient business environment. SBS provides many features that are used by larger companies, however SBS is specifically designed for small and medium businesses without the associated costs.

SBS protects your business data, simplifies your business activities, allows your staff to share data, software, and resources, and helps you easily connect with your customers.

For more information on any of our services visit:
